ABOUT US

We are the second generation of the project born in 1987 in a small carpentry workshop that has struggled for decades to innovate and always be one step ahead in the manufacture and installation of the best enclosure systems.

Nowadays, with the incorporation of the third generation, modernity, design and personalised attention set us apart from the competitors.

From the nobility of wood to the avant-garde of modern materials, our evolution has been founded on the unchanging quality that defines each project.

WHAT WE OFFER

We offer innovative and versatile large-format customised enclosure solutions designed to meet specific needs and exceed expectations to reflect the unique vision of each client.

We adapt our designs to each project, using advanced technology and cutting-edge materials, enriching each solution with the know-how we have accumulated over years of experience in the sector.

We provide comprehensive and personalised technical support, working closely with the customer to ensure close collaboration and complete satisfaction from project conception to completion.

MINIMA SL 42

System for doors with frames and panels up to 5,5 m high.

Sections 135 mm frames and 51 mm panels.

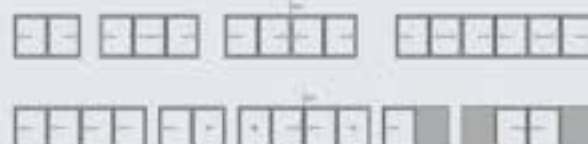

Minimalist 25 mm central node.

Glazing up to 42 mm.

Maximum weight of 600 kg per panel.

Double thermal break of 18 mm.

Possibility of lower frame with through-floor and multi-rail.

MINIMA SL 32

Minimalist linear sliding system for windows and doors up to 2,7 m high.

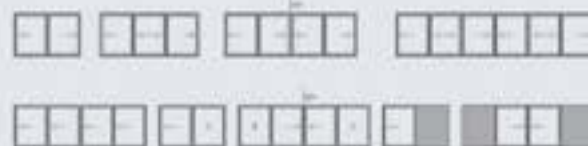

Sections 116 mm frames and 42 mm panels.

Glazing up to 32 mm.

Maximum weight up to 300 kg per panel.

Thermal break of 28 mm in frames and 14 mm in panels.

Possibility of lower frame with through-floor and multi-rail.

MINIMA PR72

Max. dimensions per panel: 1400x2400 mm.
 Hidden panel with optional hidden fittings.
 Optional frame with hidden drainage.
 Optional standard (101 mm) or reduced (81 mm) visible inverter profile.
 Glazing up to 36 mm.
 Maximum weight of 150 kg per panel.

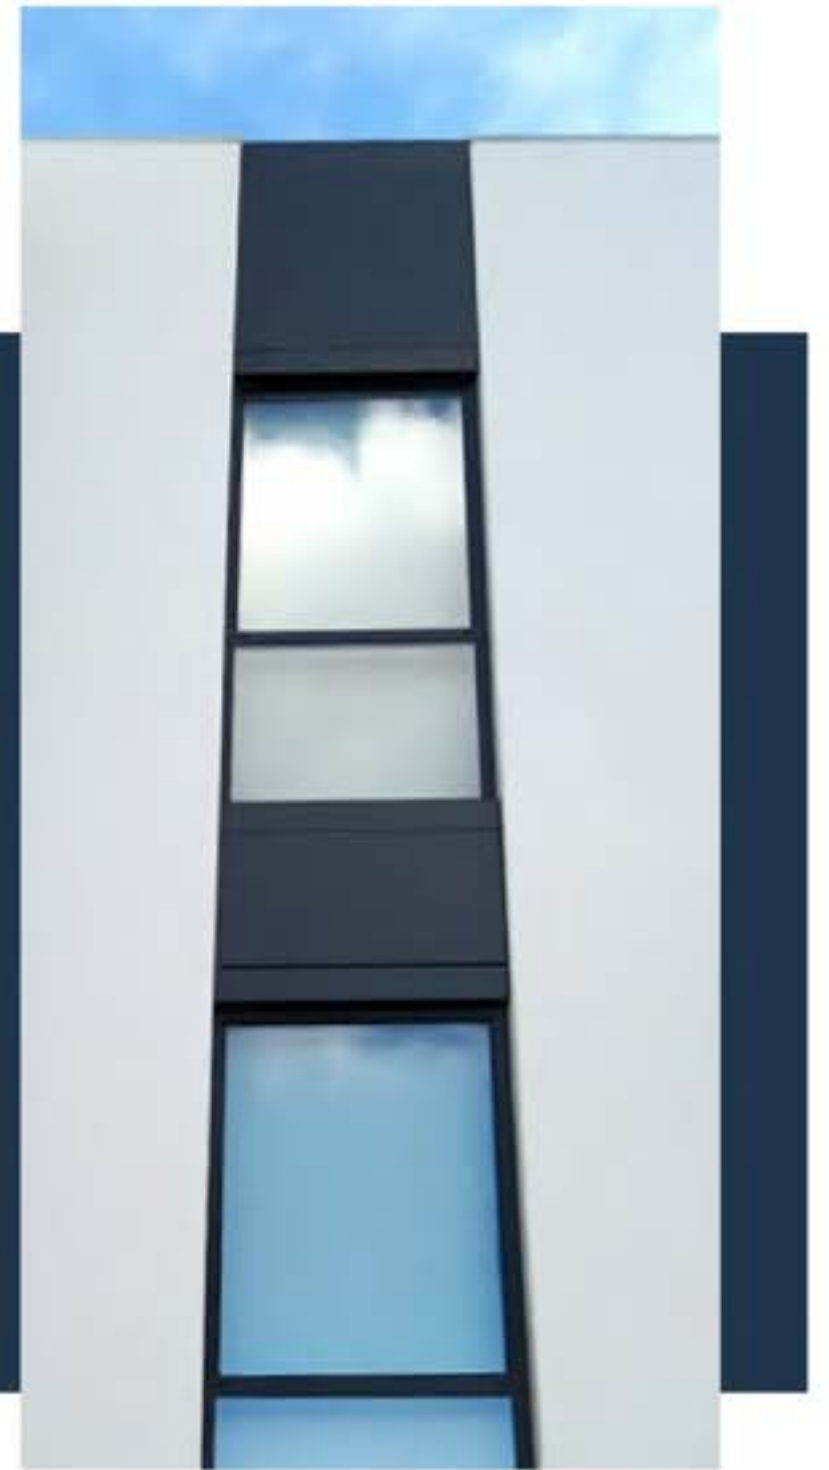

MINIMA PR72 CLASSIC

Maximum dimensions per panel: 1400x2400 mm.
 Reduced full visible section of 76 mm.
 Visible panel with 16 mm glazing bead (straight, stepped or chamfered).
 Optional adhesive beams in addition to the glazing beads.
 Glazing up to 34 mm.
 Max. weight per panel of 150 kg.

LUXGLASS

BALUSTRADE CURTAIN WALL SKYLIGHT

Our company specializes in skylights, balustrades, and curtain walls, delivering elegance, functionality, and energy efficiency.

Our **skylights** brighten spaces with natural light, our **balustrades** combine safety with style, and our **curtain walls** offer sleek facades that enhance insulation and views.

Our team of specialised technicians studies each project to offer the best solution in each case.

Tailored to client needs, our solutions transform any project into a masterpiece of light and design.

SOLAR CONTROL & OTHERS

ROOM DIVIDER
MAJORCAN DOOR
BIOCLIMATIC PERGOLE

Ensuring elegance and functionality, our **room dividers** create seamless transitions between rooms, both indoors and outdoors, offering flexibility and unobstructed views.

Majorcan doors add a traditional yet functional charm, providing privacy and ventilation.

Bioclimatic pergolas adjust to weather conditions, enhancing outdoor comfort and extending living spaces.

SOLAR CONTROL & OTHERS

ROLLER BLIND
SHUTTER
MOSQUITO NET

Enhancing comfort, privacy, and protection in any space, our **roller blinds** offer versatile light control and sleek design, fitting seamlessly into modern and traditional interiors. We offer conventional and large-format models.

Shutters provide robust security and insulation, adding aesthetic value while maintaining functionality. We offer conventional and security models, as well as large-format models.

Mosquito nets ensure a bug-free environment, allowing fresh air in while keeping pests out. We have roll-up, sliding or **large-format** models depending on the chosen carpentry.
